

Weld 2"x4"x0.125" plate to  
angle iron. Mount 2.25"  
din rail with two 10-32  
machine screws

Drill 7/16" dia. hole 1"  
down from top for bulk  
head compression fitting.

2"x 2"x 0.125" angle iron 20"  
long for 18" tank, weld to  
base plate.

Locate left corner,  
use carpenter square  
to insure top tab is  
0.75" from edge of  
base plate. Rotate  
angle iron about left  
corner as needed.
